

# STAINLESS TRANSPORT TROLLES ON 6 WHEELS WITH TILTING

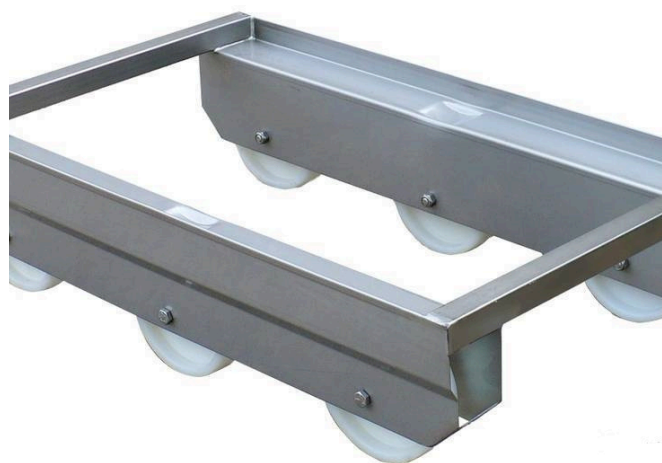

The transport trolley made of high-quality stainless steel has been designed for the efficient transportation of EURO containers and other loads. Its solid construction and well-thought-out design guarantee not only durability, but also comfort of everyday use.

Precisely designed loading dimensions of 605 x 410 mm enable easy movement of standard EURO containers. The stroller is equipped with six wheels, which ensures stability and smooth driving, even in demanding conditions. Additionally, the tilt mechanism increases mobility, allowing for easy maneuvering when fully loaded. The turn is made on the middle wheels.

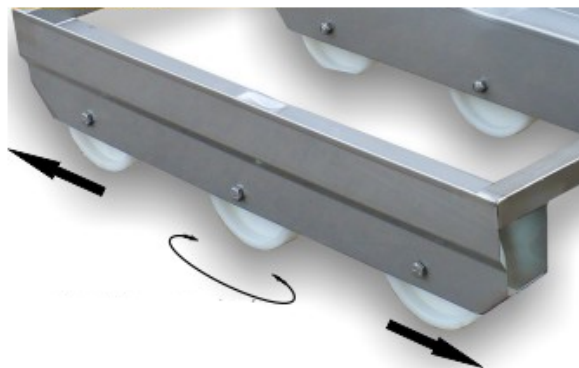

One of the most important advantages of our transport trolleys is the ability to stack containers, which allows for the transportation of larger amounts of loads at one time, increasing work efficiency. The trolley has a load capacity of up to 190 kg, making it perfect for transporting heavier goods. Its own weight of approximately 6 kg makes it light and easy to carry.

The durability and reliability of the stroller is the result of the use of 304 class stainless steel, which is highly resistant to corrosion and mechanical damage. Thanks to this, the stroller performs well even in difficult conditions and ensures trouble-free operation for many years.

## Our transport trolleys are:

- Comfort and efficiency in everyday logistics tasks.
- Stable and smooth movement provided by six wheels.
- Easy to drive and precise maneuvering thanks to the tilt mechanism.
- Strength and corrosion resistance due to the use of stainless steel.
- Perfect solution for transporting several heavy containers at the same time.
- Increased work efficiency.
- An irreplaceable piece of equipment in logistics, catering and other industries.
- Particularly recommended for the food industry.

## Technical data:

- **Material:** 304 stainless steel
- **Loading dimensions:** 605 x 410 mm
- **Number of wheels:** 6
- **Wheel material:** polyamide wheels (optionally wheels with non-marking gray rubber)
- **Weight:** 6 kg

We also produce special trolleys with other dimensions and load capacities according to the customer's order.
